DETAILED ACTION

Claims 30-35 are pending in this application.

This action is in response to the applicants' amendment and reply filed on July 8, 2002.

Response to Arguments

Applicants' arguments filed on July 8, 2002 have been fully considered but they are not persuasive. Rejections to Claims under 35 U.S.C. 102(b) and 103(a) are maintained.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 30, 32, 33, and 35 remain rejected under 35 U.S.C. 102(b) as being anticipated by Myers et al. (WO 95/15758). Applicants' arguments have been fully considered but they are not found persuasive. Applicants argue that the reference fails to disclose UVB-radiation-induced inflammatory response even though the reference does teach anti-inflammatory response in general and thus, the claims are not anticipated by the teaching of the reference. While a sound 102 rejection requires that the reference teach every element of the invention, "an anticipatory reference....need not duplicate word for word what is in the claims. Anticipation can occur when the claimed limitation is 'inherent' or otherwise implicit in the relevant reference." *Standard Havens Products, Inc. V. Gencor Indust.*, 953 F.2d 1360 (Fed. Cir. 1991). The 758' reference

clearly shows that the 6,7-dimethoxy quinazoline compounds possess inherently anti-inflammatory activities. Hence, whether the inflammation is induced by UVB radiation or other causes is not particularly relevant. It is equally irrelevant whether the compounds' modes of action are inhibition of JAK3 or CSF-1R. The phrase "UVB-radiation-induced" could be viewed as a preamble. However, the preamble of a claim does not limit the scope of the claim when it merely states a purpose or intended use of the invention. In *Integra LifeSciences*, the court disregarded the arguments that the preamble "a method of inhibiting animal cell proliferation..." specifically limited the scope of the claim whereas the reference discussed no such limitation. The court's reasoning was that "methods underlying plaintiff's claims invention will remain the same" whether the reference taught such a limitation or not.

In *Ex parte Novitski*, the Board held that a 102 rejection should be applied to a claim which states "a method for protecting a plant from pathogenic nematodes which comprises the step of inoculating said plant with a nematode-inhibiting strain of *P. cepacia*..." with a reference which discloses inoculation a plant with *Pseudomonas cepacia* type Wisconsin 526 even though the reference does not expressly disclose that *Pseudomonas cepacia* type Wisconsin 526 possesses nematode-inhibiting activity. Such an express disclosure is unnecessary because *Pseudomonas cepacia* type Wisconsin 526 inherently possess nematode-inhibiting activity. The same reasoning could be applied to the instant case. Even though the reference does not expressly disclose that the compounds can be used for UVB-induced inflammatory response, the 6,7-dimethoxy quinazoline compounds inherently possess anti-inflammatory activities including the inflammatory response caused by UVB radiation. The compounds also inherently possess the

property of inhibiting the release of prostaglandin E2 as it is well known that PGE2 is an inflammatory mediator.

Claim Rejections - 35 USC § 103

Claims 30-35 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Myers et al. (WO 95/15758) for the same reasons given above.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
